

Trap trigger detection system

To help with our pest monitoring and control, we have a.....

Trap Trigger Detection System attached to 12 stoat traps in the NW corner of Pomona Island.

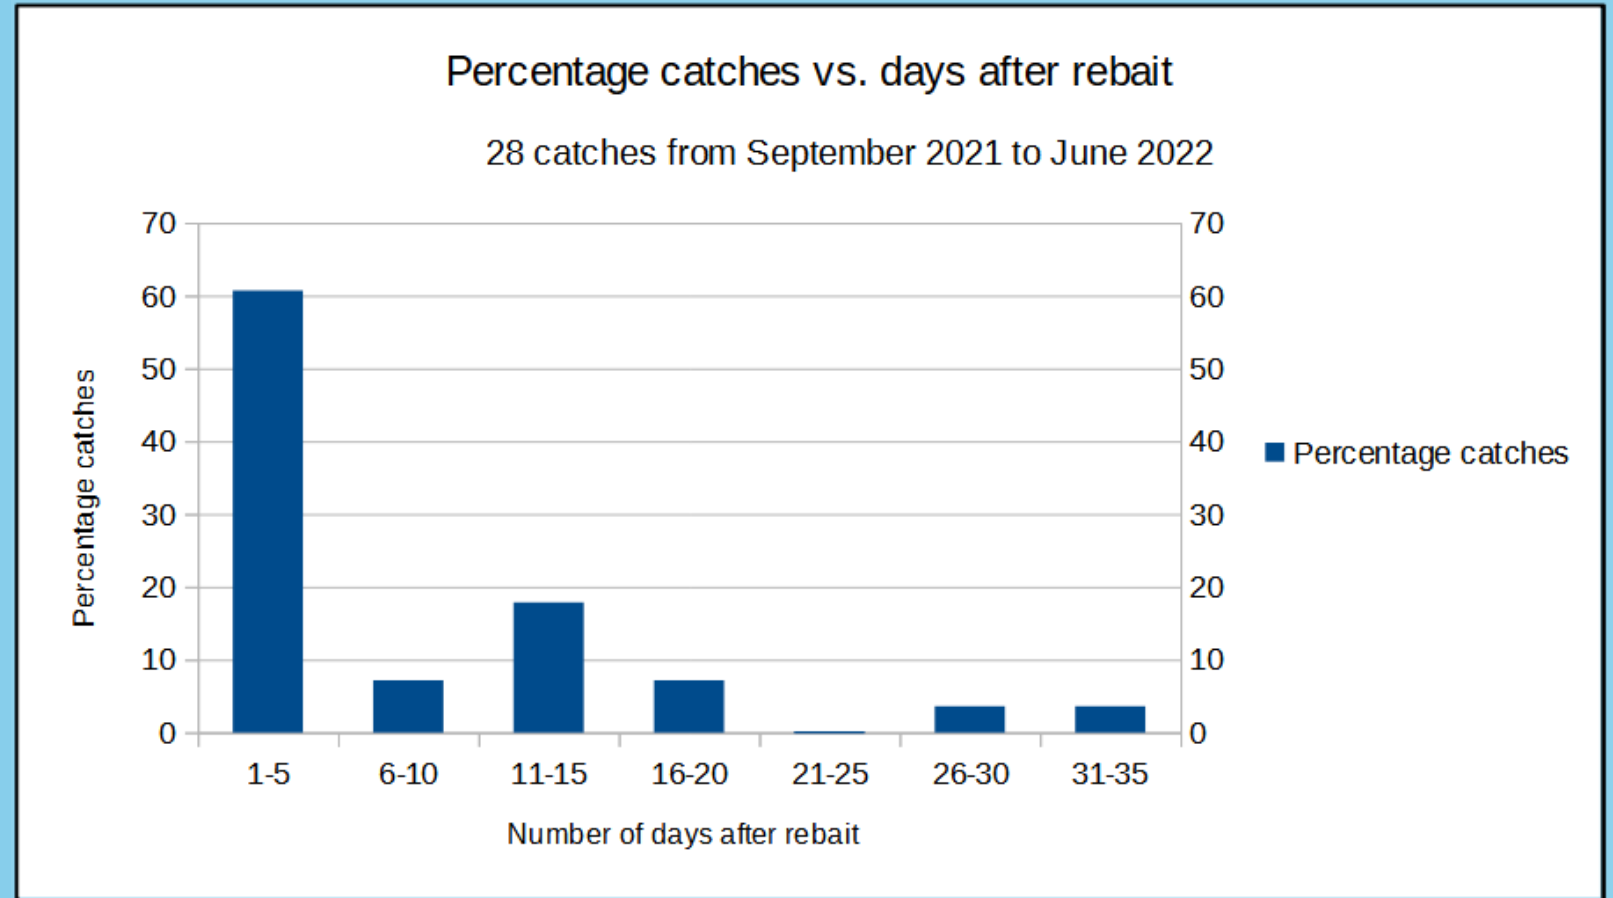

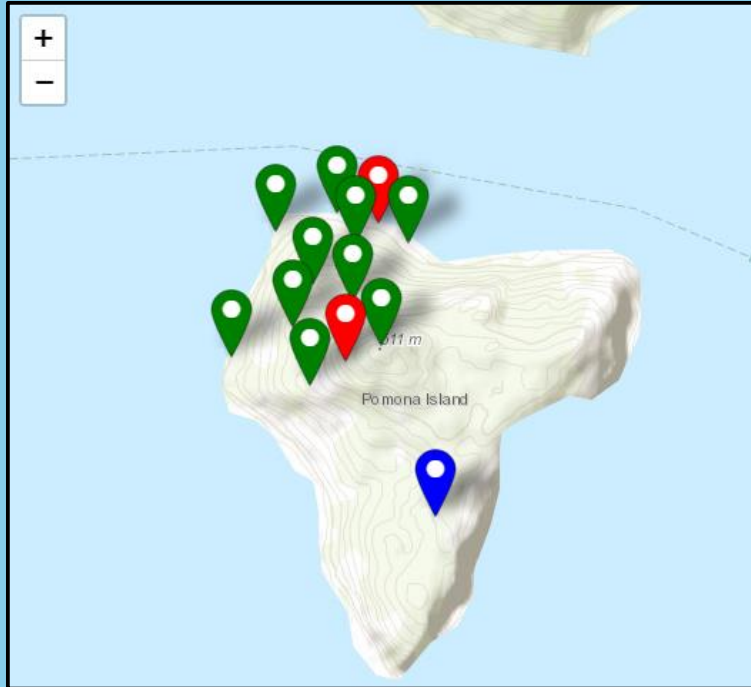

Inspiration, design and installation due to Gary Chisholm.

Consists of a base station on top of the island connected to SWARM satellite system.

Each trap has a switch and UHF radio transmitter which talks to the base station.

Trap trigger detection system

60% of catches take place in the first 5 days after a rebait.....
